HYGIENE SERVICE

Hygiene Service is the largest Greek company in the field of Hygiene Services and the only one that has a **franchising branch network throughout Greece**, while it is also active abroad in Germany, Albania, Bulgaria, Kosovo, Romania, Serbia, Czech Republic, F.Y.R.O.M. and Cyprus.

The high growth rates, led the Master Franchise to transfer its headquarters to new premises in 2007. The administrative staff offices and the warehouses of the company are located in a **new private area of 3,500sq.m** in the Industrial Area of Thessaloniki (Sindos), while the branch of the company is located in Athens.

Services – Products

ISO 9001:2008 certification, sanitizing products approved by the **National Organisation for Medicines**, registered in the **General Chemical State Laboratory** and tested by **Pasteur Institute**, representation of world-renowned firms and exclusive product lines, are just some of the factors that ensure the high quality services of Hygiene Service.

- **Automatic Sanitation**
- **Air Fresheners**
- **Flying Insects Control**
- **Feminine Hygiene**
- **Hand Hygiene**
- **Sanitary Products**
- **HACCP Products**
- **Disinsection, Rodent Extermination, Disinfection**

Flying Insects Control

“No matter how clean a space is, flies and mosquitoes are always annoying. Make the qualitative difference and change your mood!”

Guaranteed result in combating and repelling insects. With the experience and expertise of the top Greek company in the field of hygiene services, Hygiene Service offers the monthly Flying Insects Control Service with the leading and most tested products in Europe regarding their effectiveness.

* They are used in: professional kitchens and food preparation areas in restaurants, grill houses, bakeries, pastry shops, hotels, stores, hospitals, industrial premises, warehouses, etc.

* *The choice of the right spot to place the device is under the responsibility of the business owner, always according to the current legislation.*

Natural protection with pyrethrum extract!

Absolute solution for Flies and Mosquitoes

PIR O'SOL Insect repellent Spray

PIR O'SOL is based on natural pyrethrum (at 100g, pyrethrum extract 25%, 7,7g) and can effectively control flying and crawling insects (flies, horseflies, mosquitoes, butterflies, or cockroaches, ants and silverfish respectively). Because the active substance is highly concentrated, the bottle has a special calibrated valve that allows the release of only 50 mg of the product at a time. This valve, in combination with the automatic spray dispenser ensures that the correct amount of product is sprayed and avoids excessive or insufficient doses. The product is designed to be used with the automatic SKYLINE dispenser. By programming 1 spray every 7 to 15 minutes, you ensure active insect repellent action for 1 month, for a space of about 200 m³.

Marketing Authorization by the Hellenic Ministry of Rural Development and Food: ΤΠ19-0062/21-03-2012.

PIRACTOL Insect repellent Spray

PIRACTOL is based on natural pyrethrum (at 100g, pyrethrum extract 25%, 5,2g) and the synergist Piperonyl butoxide. With its concentrated composition, it offers strong action and repels all flying and crawling insects (flies, mosquitoes or cockroaches, ants and fleas respectively).

The special calibrated valve sprays a specific amount that ensures control in a space of about 200 m³, so as to avoid the use of the product in excessive and inappropriate doses.

Marketing Authorization by the Ministry of Rural Development and Food: ΤΠ19-0086/10.16.2012

"Insect repellent sprays are available only for professional use with the automatic spray dispensers of Hygiene Service".

Biotal 7

Biotal 7, is made entirely of natural substances and constitutes a particularly effective defense against harmful bacteria and viruses responsible for HIV, Hepatitis B, C.

“Your customers expect your toilet to be as clean as the toilet of a house.”

Feminine Hygiene

According to the current legislation the disposal of feminine hygiene waste should be conducted in separate bins. Therefore, Hygiene Service offers to every professional space the absolutely necessary Feminine Hygiene Service.

When feminine hygiene wastes are accumulated in large quantities can become particularly harmful. With the feminine hygiene service this problem is solved and you can be absolutely sure that even the last sanitary napkin or tampon will become something completely harmless, putting an end to unpleasant odors.

The qualified staff of **Hygiene Service** replaces every 28 days or more regularly the used unit you have in your bathroom with a new and disinfected one, in the most discreet way.

Essential Service in: **mass catering areas, airports, beauty centers, offices, factories, sports facilities, foodservice areas, highways, hair salons, etc.**

Service appropriate for: **sanitary napkins, tampons, incontinence pads, etc.**
Female clients must know that you care for their hygiene needs.

Disinfection Rodent Extermination Disinfection

“Have you ever thought that a “germ” can “shut down” your business because of health reasons?”

Hygiene Service and Pest Control Department, with specialized and skilled scientists provide reliable disinfection solutions with innovative equipment and disinfectants that combine antiviral activity and detergency properties.

Complete solutions of pest and rodent control - Disinfection

with applications:

- According to HACCP
- Certified according to ISO 9001

Disinfection is a priority for spaces where hygiene is a necessity in order to combat and inactivate **viruses, germs, bacteria and fungi** so as to exterminate infectious agents and prevent the transmission of infectious diseases.

Specialized consultants of **Hygiene Service** visit your place for an autopsy and suggest the appropriate method to cope with the issue you're facing.

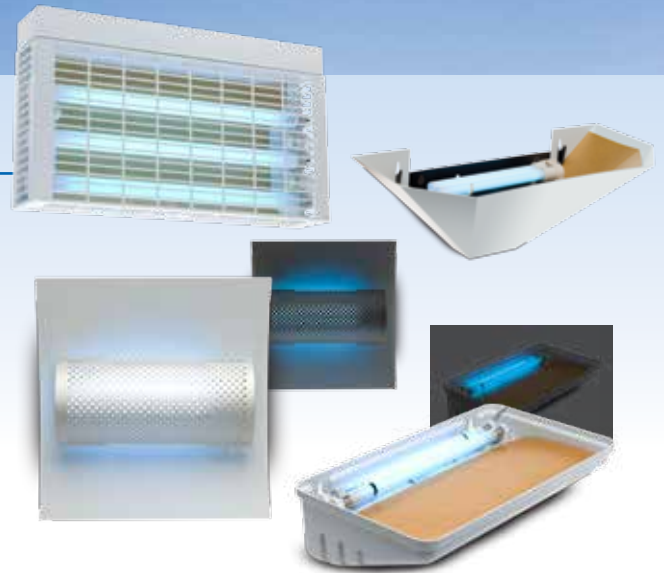

Applications necessary in hygiene sensitive areas like **schools, gyms, clinics, restaurants, food industries, hospitals** and public places where many people are gathered together on a daily basis.

Each client receives a disinfection-pest and rodent control information folder that describes in detail the applications in order to present it in case of inspection.

Electric insect traps

- Ideal devices for trapping flying insects in foodservice areas, food industry, hotel complexes, etc.
- Discrete device design
- Many mounting options (wall, ceiling, corners, etc.)
- Metallic construction for durability
- Available spare parts: Attractant light & Adhesive Surfaces.

Bait Stations

Complete range of bait stations in plenty designs and colours, suitable for all rodent species. Made of solid material for durability in time and lockable with a key, can be placed in any indoor or outdoor areas. The baits are fastened securely to prevent being moved by rodents. Each bait station is accompanied by a special warning label which indicates its position and existence.

Repelling birds and reptiles

Spikes: Placed on buildings facades for repelling birds.
Herpetex: Safe formula to protect spaces from possible reptile invasions.
